

Drum Level Indicator

GENERAL INFORMATION

- Provides the Fleet a simple, cost effective way to gauge the fill level of 55-gallon drums.
- Prevents hazardous materials spills and the subsequent handling and clean-up resulting from over filling drums.
- Fit into the small bung hole on the drum; it “pops up” when the drum is almost full.
- TM Number S9593-CS-CAT-010
- APL: 89000 series

OPERATIONAL INFORMATION

- In a typical 55 gallon drum, if the indicator is fully extended at 2 1/8 inches above the drum, the drum should contain 52 gallons.
- If the indicator is extended 5/8 inch above the drum, the drum will contain approximately 49 1/2 gallons.
- Always leave a headspace on containers.
- Stop adding to the drum when indicator first pops up.
